PROGRAM

This seminar takes an extensive look at what hospice care is, and what it is not. The focus is to debunk common myths about hospice and help healthcare providers gain a comprehensive understanding of hospice benefits and services. Emphasis is placed on how hospice can be utilized as preventative medicine which not only allows resident/patients to live longer, but to live longer with more quality of life. Also to be discussed is the determination of resident/patient readiness. Clarification is provided on what differentiates hospice and palliative care. And, a special focus will be given to how partnering with hospice in the care of residents/patients who qualify for this service benefits post-acute care facilities and the hospitals with which they partner.
