PROGRAM

The Medicare payment model that became effective October 1 this year represents a sea change in skilled nursing providers in that resident's condition, rather than therapy minutes, will drive reimbursement. It also represents a sea change in the mechanics of reimbursement. Under the Patient-Driven Payment Model, ICD-10 codes will form the basis of reimbursements, making it crucial for SNFs to have accurate coding.

The level of detail and accuracy required for ICD-10 coding under PDPM is new for SNFs, and the ICD-10 code accuracy will, come October 1, be connected to payment for services in a way that it wasn't before. This seminar will give providers the keys to unlock the secret of ICD-10-CM coding.

This two-day class will provide long term care providers the knowledge and skill needed to accurately assign ICD-10-CM codes for clinical and billing practices. Long term care providers will be confident with their coding process from admission to discharge.
