NH Administrator

PROGRAM

This course is designed specifically to prepare infection preventionists to manage infection prevention and control programs in non-acute care settings, especially long term care settings such as nursing and rehabilitation facilities.

This course is also suitable for those who are providing back-up assistance to the facility designated infection preventionist, as well as local health department infectious disease staff, state and county surveyors

The course content consists of topics such as CMS regulations, surveillance for infections, outbreak recognition and management, and precautions for transmissible infections. Program elements, microbiology, environmental concerns, and immunization of health care providers in this setting are also covered.

OBJECTIVES

1. Describe the role of the Infection Preventionist in Long Term Care Settings.
2. Identify Centers for Medicare and Medicaid Services (CMS) regulatory requirements for infection prevention and control programs in Long Term Care Facilities.
3. List the components of an Antibiotic Stewardship Program and its implementation.
4. Describe the Bloodborne Pathogen Standard and required training for staff.
5. Identify key components of an Infection Prevention and Control Program in Long Term Care Facilities
6. Discuss the Centers for Disease Control and Prevention's recommendations for hand hygiene and environmental infection control in all health care settings.
7. Apply the principles and methods of standard and transmission-based precautions to recommend a particular type of precaution using patient scenarios.
8. Identify common multi-drug resistant organisms found in Long Term Care and describe methods of control.
9. Identify common organisms found in Long Term Care facilities and describe methods of control.
10. Develop surveillance strategies, methodologies, and rate calculations for the identification of health care associated infections (HAIs) in long term care facilities.
11. Using standard definitions, practice identifying HAI's and performing rate calculations using patient scenarios.
12. Describe the methods used to identify and control infectious disease outbreaks in long term care settings including reporting requirements.
13. Describe the Infection Preventionist role in regard to Employee Health.
14. Describe the principles of cleaning, disinfection, and product selection.
15. Describe the role of the Infection Preventionist with a Water Management Program.
16. Describe the roll of the Infection Preventionist during Construction and Renovation
17. List the daily, weekly, monthly, and yearly tasks of the Infection Preventionist
18. Describe the relationship of the Infection Control and Prevention Program with the facilities Quality Assurance Performance Improvement Program (QAPI).
19. List the daily, weekly, monthly, and yearly tasks of the Infection Preventionist.

**PLEASE BRING A
CALCULATOR**

**This Course Complies with CMS Final Rules and State
of Maryland Regulations**

Continuing Education Credits

This program is sponsored by The Beacon Institute. This program is approved by the National Continuing Education Review Service (NCERS) of the National Association of Boards of Examiners of Long Term Care Administrators .
