UPCOMING WEBINARS

Hallucinations & Delusions Associated With Parkinson's Disease Psychosis In Long-Term Care

Wednesday, April 15th 2:00 pm EST

Non-motor symptoms of Parkinson's disease include hallucinations and delusions, a hallmark characteristic of Parkinson's disease psychosis (PDP). This presentation will review PDP symptoms, screening, and appropriate management of PDP.

Register Today:

<https://bit.ly/webinar041526-PDPinLTC>

Learning Objectives

- Understand hallucinations and delusions associated with PD psychosis, a nonmotor aspect of PD
- Introduce approaches to diagnosis and screening for PD psychosis
- Review the appropriate management of hallucinations and delusions associated with PD psychosis
- Review clinical efficacy data and safety profile of NUPLAZID (pimavanserin) for hallucinations and delusions associated with PD psychosis

Practical Approaches to Managing Behaviors: Person-Centered Care Planning

Wednesday, April 29th 1:00 pm EST

New CMS guidance reinforces the importance of thorough assessment, accurate diagnoses, documented non pharmacologic interventions, and careful stewardship of antipsychotic medications as part of a broader behavior management framework.

Register Today:

<https://bit.ly/webinar042926-managingbehaviors>

Learning Objectives

- Understand the negative impact poor behavior management can have on your quality outcomes
- Ensure psychotropic medications are used only when clinically appropriate, following CMS guidance under F605 to prevent unnecessary
- Update internal tracking systems to account for the new hybrid QM design
- Assist facility leadership in training staff to recognize and respond to behaviors as expressions of unmet needs, incorporating trauma-informed care, environmental modifications, meaningful engagement, and individualized support strategies

Preventing Avoidable Hospitalizations by Providing Appropriate Care and Treatment

Wednesday, May 6th 1:00 pm EST

Avoidable hospital transfers remain a significant challenge for assisted living and long-term care providers. Delayed recognition of illness, limited staffing, and shortened orientation programs can lead to unnecessary hospitalizations, lost revenue, and increased legal risk.

This webinar will review ways to **reduce avoidable hospitalizations, common diagnoses** that can often be treated within the facility, and the **early warning signs staff must recognize** to intervene quickly. Participants will also explore **when hospital transfers are necessary, required documentation, and the clinical responsibilities of RNs and LPNs.**

Join us to learn practical strategies that help facilities **provide appropriate care, improve outcomes, and reduce preventable hospital transfers**

Register Today:

<https://bit.ly/webinar050626avoidinghospitalizations>

Learning Objectives

- Identify common conditions that frequently lead to avoidable hospitalizations in assisted living and long-term care settings
- Recognize early warning signs and symptoms that indicate a resident's condition is changing
- Determine which conditions can safely be treated within the facility and which require hospital transfer
- Clarify the roles and responsibilities of RNs and LPNs in resident assessment and clinical decision-making

Antipsychotic Medication - A New Perspective

Thursday, June 4th 2:00 pm

The Centers for Medicare and Medicaid Services continue to focus on nursing home use of antipsychotic and behavior-altering medications. CMS continues its regulatory and audit focus to identify the inappropriate use of antipsychotic drugs and prescribing practices. Join us and discover how to facilitate a process to reduce antipsychotic medication and improve the resident's quality of life.

Register Today:

<https://bit.ly/webinar060426-antipsychoticmeds>

Learning Objectives

- Explain CMS expectations related to antipsychotic medication reduction
- Apply interdisciplinary strategies to reduce inappropriate antipsychotic use
- Utilize audit findings to improve medication management and quality outcomes
- Implement process-based strategies to reduce behavior-altering medications while maintaining safe, person-centered care.

All webinars are approved for 1 NAB Credit for Nursing Home Administrators and Nurses. After registering, you will receive a confirmation email containing information on how to join the webinar. All webinars are recorded, archived, and posted on our website: www.pharmscript.com.
